

Hero Ultra 1000

SKU SHA28317

PRICE \$1750

FEATURES

- Improves 4G signal and voice calls on Telstra, Optus, Vodafone, and most Australian mobile networks, with support for a wider range of 5G frequency bands
- An excellent choice for urban locations where multiple 4G and 5G frequency bands are in use, while also performing in rural, regional, and low-coverage areas
- Delivers clearer voice calls and faster, more reliable 4G and 5G mobile data indoors

ABOUT

A reliable signal starts at the source, and Signal Hero Ultra 1000 is designed to bring stable mobile connectivity into larger homes, offices, and workplaces. Missed calls, dropped connections, and slow data no longer need to be part of daily life in rural, regional, urban, or low-coverage areas.

Signal Hero Ultra works with Telstra, Optus, Vodafone, and most Australian mobile networks, delivering reliable 4G voice and data while supporting a wider range of 5G frequency bands. It is an excellent choice for urban locations where multiple 4G and 5G bands are in use and performs best where outdoor signal is strong, typically around 3–5 bars, while also providing reliable performance in regional and low-coverage areas. A dedicated outdoor antenna captures available signal, transfers it through professional-grade cabling to the booster, and redistributes the improved signal indoors via three panel antennas, providing reliable coverage for larger properties with more than two rooms or multiple floors. Ideal for larger homes, offices, commercial premises, and properties with multiple users, it also supports 4G and 5G SIM routers.

Installation follows a proven layout used across Australian properties. Our technical support team is available before and after purchase. **No subscriptions or ongoing fees. Includes a 60-day money-back guarantee and a 3-year warranty.**

INSTANT SIGNAL BOOST

UP TO +70db GAIN

SUPPORTS UP TO 25 USERS CONNECTIONS

FAST NETWORK & DATA SPEED

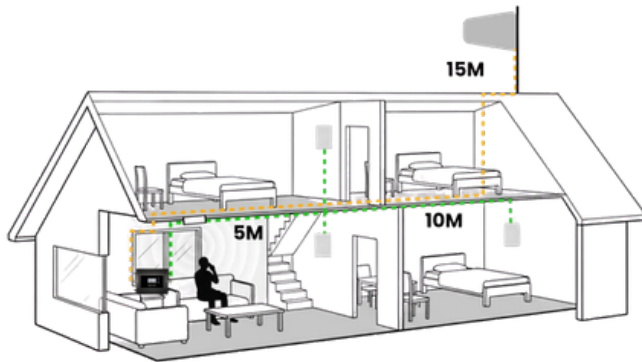

KIT INCLUDES

SPECIFICATIONS

MODEL NUMBER	
FREQUENCIES	BAND 28, 3, 1 and 7 700MHz / 1800 MHz / 2100MHz / 2600MHz
MAX GAIN	70 dB ±2
IMPEDANCE	50 Ohm
POWER SUPPLY	AC 100–240V
CONNECTORS	N-FEMALE
BOOSTER DIMENSIONS	22 x 14.5 x 5.5 cm
BOOSTER WEIGHT	<0.9Kkg

INSTALLATION

1

The signal is received from the outdoor cell towers and transmitted through the cable to the booster box.

2

The booster box receives the signal from the outdoor aerial and retransmits it to the indoor antenna via a cable.

3

The panel antenna mounted on the wall receives the signal and retransmits a clean, high-quality phone signal throughout the property.
