

Hero Force 600 Pro

SKU SHA2831-600-Pro

PRICE \$1175

FEATURES

- Improves 4G signal and voice calls on Telstra, Optus, Vodafone, and most Australian mobile networks, with support for basic 5G coverage
- Universal solution for rural, regional, urban, and low-coverage locations where outdoor signal is weak but available
- Delivers clearer voice calls and more reliable 4G and basic 5G mobile data indoors

ABOUT

Reliable signal starts at the source, and Signal Hero Core is built to bring it into your home. Missed calls, dropped connections, and unstable data do not have to be part of daily life in rural, semi-urban, or low-coverage areas, even where outdoor signal is limited to 1 to 2 bars.

Designed as a universal solution, Signal Hero Core supports all major UK mobile networks, delivering stable 4G voice and data, plus basic 5G coverage where available. It is also designed for two-storey homes and buildings where more than one indoor antenna is required to provide wider indoor coverage. It captures available outdoor signal through a dedicated external antenna, transfers it via professional-grade cabling to the booster, and redistributes the strengthened signal indoors using panel antennas. The result is clearer calls and more consistent mobile data throughout your property. Suitable for everyday mobile use and 4G SIM routers, it is ideal where indoor reception is weak, but some outdoor signal exists.

Installation follows a straightforward, proven layout used in residential and rural properties. Our UK-based support team is available before and after purchase.

There are no subscriptions or ongoing fees. Signal Hero Force includes a 60-day money-back guarantee and a 3-year warranty for added confidence.

INSTANT SIGNAL BOOST

UP TO +72db GAIN

SUPPORTS UP TO 30 USERS CONNECTIONS

FAST NETWORK & DATA SPEED

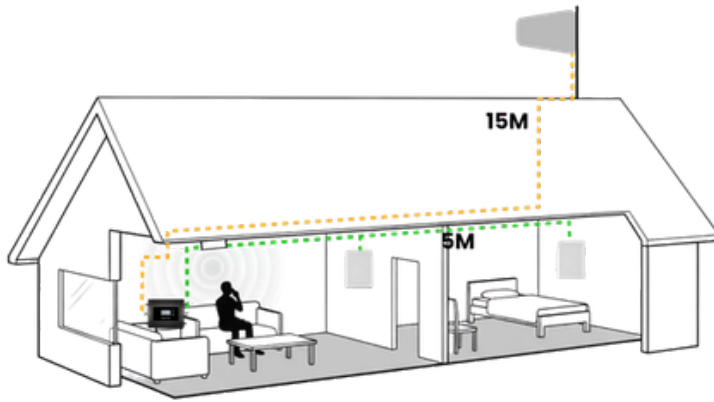

KIT INCLUDES

SPECIFICATIONS

MODEL NUMBER	SHA2831-300-Pro
FREQUENCIES	BAND 28, 3 and 1 700 MHz / 1800 MHz / 2100MHz
MAX GAIN	72 dB ±2
IMPEDANCE	50 Ohm
POWER SUPPLY	AC 100–240V
CONNECTORS	N-FEMALE
BOOSTER DIMENSIONS	22 x 14.5 x 5.5 cm
BOOSTER WEIGHT	<0.9Kkg

INSTALLATION

1

The signal is received from the outdoor cell towers and transmitted through the cable to the booster box.

2

The booster box receives the signal from the outdoor aerial and retransmits it to the indoor antenna via a cable.

3

The panel antenna mounted on the wall receives the signal and retransmits a clean, high-quality phone signal throughout the property.
