

Hero Ultra 1500 Pro

SKU SHA28317

PRICE \$2350 / ~~\$2550~~

FEATURES

- Improves 4G signal and voice calls on Telstra, Optus, Vodafone, and most Australian mobile networks, with support for a wider range of 5G frequency bands
 - An excellent choice for urban locations where multiple 4G and 5G frequency bands are in use, while also performing in rural, regional, and low-coverage areas
- Delivers clearer voice calls and faster, more reliable 4G and 5G mobile data indoors

**INSTANT SIGNAL BOOST**

**UP TO +80db GAIN**

**SUPPORTS UP TO 100 USERS CONNECTIONS**

**FAST NETWORK & DATA SPEED**

ABOUT

A reliable signal starts at the source, and Signal Hero Ultra 1500 Pro is designed to bring stable mobile connectivity into large homes, offices, commercial buildings, and demanding installations. Missed calls, dropped connections, and slow data no longer need to be part of daily life in rural, regional, urban, or low-coverage areas.

Signal Hero Ultra works with Telstra, Optus, Vodafone, and most Australian mobile networks, delivering reliable 4G voice and data while supporting a wider range of 5G frequency bands. It is an excellent choice for urban locations where multiple 4G and 5G bands are in use and performs exceptionally well where outdoor signal is weak, typically around 1–3 bars. A dedicated outdoor antenna captures available signal, transfers it through professional-grade cabling to the booster, and redistributes the improved signal indoors via three panel antennas, providing reliable coverage across large properties, multiple rooms, and multi-storey buildings.

Ideal for large homes, offices, warehouses, and properties with many users, it also supports 4G and 5G SIM routers.

Installation follows a proven layout used across Australian properties. Our technical support team is available before and after purchase. **No subscriptions or ongoing fees. Includes a 60-day money-back guarantee and a 3-year warranty.**

KIT INCLUDES

SPECIFICATIONS

MODEL NUMBER	SH20831-1500-Pro
FREQUENCIES	BAND 28, 3, 1 and 7 700MHz / 180 MHz / 2100MHz / 2700MHz
MAX GAIN	80 dB ±2
IMPEDANCE	50 Ohm
POWER SUPPLY	AC 100–240V
CONNECTORS	N-FEMALE
BOOSTER DIMENSIONS	48 x 20 x 5.5 cm
BOOSTER WEIGHT	<5Kkg

INSTALLATION

1

The signal is received from the outdoor cell towers and transmitted through the cable to the booster box.

2

The booster box receives the signal from the outdoor aerial and retransmits it to the indoor antenna via a cable.

3

The panel antenna mounted on the wall receives the signal and retransmits a clean, high-quality phone signal throughout the property.
