

Hero Core 1000 Pro

SKU SHA283-1000-Pro

PRICE \$1650 / ~~\$1850~~

FEATURES

- Improves 4G signal and voice calls on Telstra, Optus, Vodafone, and most Australian mobile networks
- Designed for rural, regional, and low-coverage locations where outdoor signal is weak but available
- Supports the main Australian 4G frequency bands used by major mobile providers
- Delivers clearer voice calls and faster, more reliable 4G mobile data indoors

ABOUT

Reliable signal starts at the source, and Signal Hero Core 1000 Pro is designed to bring it consistently indoors. Missed calls, dropped connections, and unstable data don't have to be part of daily life in rural, regional, or low-coverage areas. The system is built to cover properties up to 1000 sqm, making it ideal for larger Australian homes, offices, and multi-room buildings.

Signal Hero Core 1000 Pro works with Telstra, Optus, Vodafone, and most Australian mobile networks, delivering reliable 4G data and dependable voice calls. It captures available signal from the nearest mobile tower using a dedicated outdoor antenna, transfers it through professional-grade cabling to the booster unit, and redistributes the strengthened signal indoors via a panel antenna. This setup is ideal where an outdoor signal exists but struggles to reach indoors. It works effectively for everyday mobile use and 4G SIM routers, helping stabilise calls and mobile data throughout the building.

Installation follows a proven layout for residential, rural, and regional environments.

There are no subscriptions or ongoing fees. Signal Hero Core 1000 Pro includes a 60-day money-back guarantee and a 3-year warranty.

INSTANT SIGNAL BOOST

UP TO +80db GAIN

SUPPORTS UP TO 50 USERS CONNECTIONS

FAST NETWORK & DATA SPEED

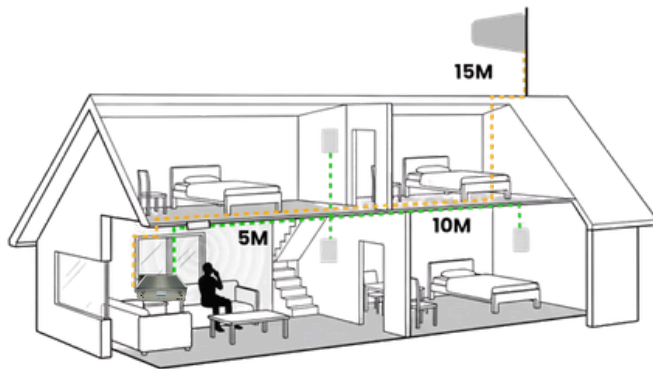

KIT INCLUDES

SPECIFICATIONS

MODEL NUMBER	SH2A283-1000-Pro
FREQUENCIES	BAND 28 AND 3 700 MHz / 1800 MHz
MAX GAIN	80 dB $\pm$ 2
IMPEDANCE	50 Ohm
POWER SUPPLY	AC 100-240V
CONNECTORS	N-FEMALE
WORKING TEMPERATURE	-25°C ~+55°C
BOOSTER DIMENSIONS	26 x 25 x 7.6 cm
BOOSTER WEIGHT	<4Kkg

INSTALLATION

1

The signal is received from the outdoor cell towers and transmitted through the cable to the booster box.

2

The booster box receives the signal from the outdoor aerial and retransmits it to the indoor antenna via a cable.

3

The panel antenna mounted on the wall receives the signal and retransmits a clean, high-quality phone signal throughout the property.
