

Hero Max 300

SKU SHA288317-300

PRICE \$1350

FEATURES

- Improves 4G and 5G signal, voice calls, and SMS on Telstra, Optus, Vodafone, and most Australian mobile networks, with full support for a wide range of 5G frequency bands
- Universal solution for rural, regional, urban, and low-coverage locations, making it an excellent choice for urban areas where multiple 4G and 5G bands are in use
- Delivers clearer voice calls and faster, more reliable 4G and 5G mobile data indoors

ABOUT

Reliable signal starts at the source, and Signal Hero Max 300 is built to deliver stable mobile connectivity throughout your home or workplace. Missed calls, dropped connections, and slow data no longer need to be part of daily life in rural, regional, urban, or low-coverage areas across Australia.

Designed as a universal solution, Signal Hero Max 300 works with Telstra, Optus, Vodafone, and most Australian mobile networks, providing reliable 4G voice and data along with strong 5G coverage where available. Its advanced architecture is built to support a wide range of modern 5G frequencies, making it an excellent choice for urban areas where multiple 4G and 5G bands are in use.

An external antenna captures available outdoor signal and transfers it via professional-grade cabling to the booster unit. The improved signal is then redistributed indoors through a panel antenna, resulting in clearer calls, stronger signal bars, and more stable **4G and 5G mobile data.**

With high connection capacity and the ability to work with multiple nearby mobile towers, it is ideal for offices, medium-sized homes, properties using several mobile providers, or locations where many users need dependable service at the same time. Installation follows a proven Australian property layout. **No subscriptions or ongoing fees. Includes a 60-day money-back guarantee and a 3-year warranty.**

INSTANT SIGNAL BOOST

UP TO +70db GAIN

SUPPORTS UP TO 25 USERS CONNECTIONS

FAST NETWORK & DATA SPEED

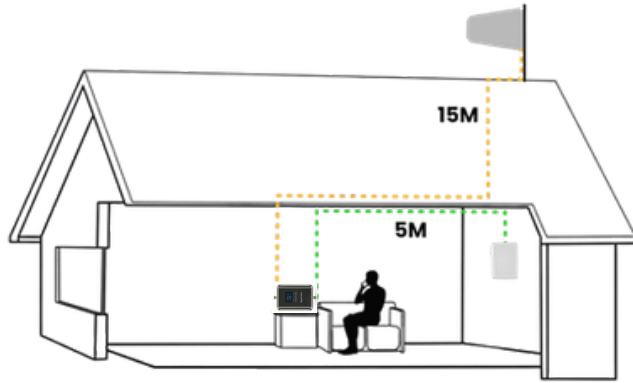

KIT INCLUDES

SPECIFICATIONS

MODEL NUMBER	SHA288317-300
FREQUENCIES	BAND 28, 8, 3, 1 and 7 700Mhz / 900MHz / 1800MHz / 2100MHz / 2600MHz
MAX GAIN	70 dB $\pm$ 2
IMPEDANCE	50 Ohm
POWER SUPPLY	AC 100-240V
CONNECTORS	N-FEMALE
BOOSTER DIMENSIONS	22 x 14.5 x 5.5 cm
BOOSTER WEIGHT	<2Kkg

INSTALLATION

1

The signal is received from the outdoor cell towers and transmitted through the cable to the booster box.

2

The booster box receives the signal from the outdoor aerial and retransmits it to the indoor antenna via a cable.

3

The panel antenna mounted on the wall receives the signal and retransmits a clean, high-quality phone signal throughout the property.
