

Hero Max 1500 Pro

SKU SHA288317-1500-Pro

PRICE \$2950 / \$3550

FEATURES

- Improves 4G and 5G signal, voice calls, and SMS on Telstra, Optus, Vodafone, and most Australian mobile networks, with full support for a wide range of 5G frequency bands
- Universal solution for rural, regional, urban, and low-coverage locations, making it an excellent choice for urban areas where multiple 4G and 5G bands are in use
- Delivers clearer voice calls and faster, more reliable 4G and 5G mobile data indoors

ABOUT

Reliable signal starts at the source, and Signal Hero Max 1500 Pro is built to deliver stable mobile connectivity throughout large homes, offices, and commercial properties. Missed calls, dropped connections, and slow data no longer need to be part of daily life in rural, regional, urban, or low-coverage areas across Australia.

As one of our most advanced professional-grade solutions, **Signal Hero Max 1500 Pro works with Telstra, Optus, Vodafone, and most Australian mobile networks, providing reliable 4G voice and data with strong 5G coverage. Its advanced architecture supports a wide range of modern 5G frequencies, making it an excellent choice for urban areas where multiple 4G and 5G bands are in use, while delivering exceptional performance for demanding rural and commercial projects.**

A high-gain outdoor antenna captures available signal and transfers it via professional-grade cabling to the booster. The improved signal is distributed indoors through three panel antennas, providing consistent coverage across large properties, multiple rooms, and multi-storey buildings.

With high connection capacity and the ability to utilise signals from multiple nearby mobile towers, it is ideal for large homes, offices, warehouses, commercial buildings, and demanding installations. Installation follows a proven Australian property layout. **No subscriptions or ongoing fees. Includes a 60-day money-back guarantee and a 3-year warranty.**

INSTANT SIGNAL BOOST

UP TO +80db GAIN

SUPPORTS UP TO 30 USERS CONNECTIONS

FAST NETWORK & DATA SPEED

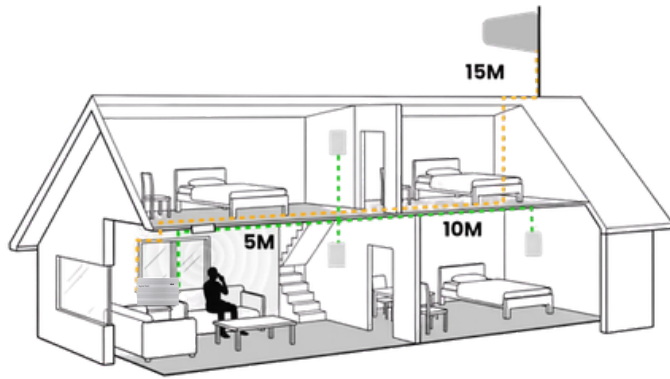

KIT INCLUDES

SPECIFICATIONS

MODEL NUMBER	SHA288317-1500-Pro
FREQUENCIES	BAND 28, 8, 3, 1 and 7 700Mhz / 900MHz / 1800MHz / 2100MHz / 2600MHz
MAX GAIN	80 dB ±2
IMPEDANCE	50 Ohm
POWER SUPPLY	AC 100-240V
CONNECTORS	N-FEMALE
BOOSTER DIMENSIONS	49 x 20 x 5.5 cm
BOOSTER WEIGHT	<5kg

INSTALLATION

1

The signal is received from the outdoor cell towers and transmitted through the cable to the booster box.

2

The booster box receives the signal from the outdoor aerial and retransmits it to the indoor antenna via a cable.

3

The panel antenna mounted on the wall receives the signal and retransmits a clean, high-quality phone signal throughout the property.
