

Hero Core 300

SKU SHA283-300

PRICE \$645

FEATURES

- Improves 4G signal and voice calls on Telstra, Optus, Vodafone, and most Australian mobile networks
- Designed for rural, regional, and low-coverage locations
 - Supports the main Australian 4G frequency bands used by major mobile providers
 - Delivers clearer calls and more reliable 4G mobile data indoors

ABOUT

Reliable signal begins outside and **Signal Hero Core 300 is engineered to bring it consistently indoors.** Missed calls, dropped connections, and unstable mobile data don't have to be part of everyday life in rural, regional, or low-coverage areas. Designed as a universal solution, **Signal Hero Core works with Telstra, Optus, Vodafone,** and most Australian mobile networks, delivering reliable 4G data and clear voice calls. It captures available signal from the nearest mobile tower using a dedicated outdoor antenna, transfers it through professional-grade cabling to the booster unit, and redistributes the strengthened signal indoors via a panel antenna. This proven configuration makes it suitable for a wide range of homes, businesses, and regional properties. Signal Hero Core is ideal for everyday mobile use as well as 4G SIM routers, helping stabilise voice calls and mobile data where outdoor signal is available but indoor reception is weak. Installation is straightforward and follows a proven design trusted across residential, rural, and regional environments. Our technical support team is available before and after your purchase to assist with installation and ongoing support. **There are no subscriptions or ongoing fees. Every unit includes a 60-day money-back guarantee** and a 3-year warranty, so you can improve your mobile signal with confidence.

INSTANT SIGNAL BOOST

UP TO +70db GAIN

SUPPORTS UP TO 25 USERS CONNECTIONS

FAST NETWORK & DATA SPEED

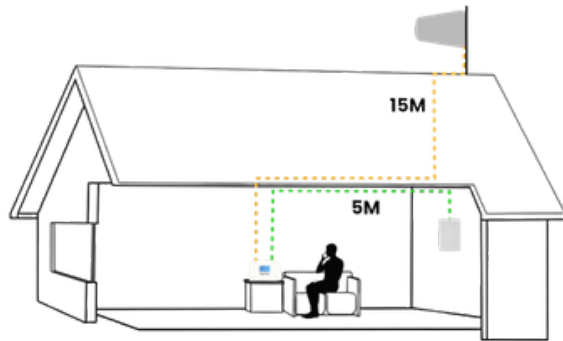

KIT INCLUDES

SPECIFICATIONS

MODEL NUMBER	SHA283-300
FREQUENCIES	BAND 28 AND 3 700 MHz / 1800 MHz
MAX GAIN	70 dB ±2
IMPEDANCE	50 Ohm
POWER SUPPLY	AC 100–240V
CONNECTORS	SMA-FEMALE
BOOSTER DIMENSIONS	21 x 15 x 2.8 cm
BOOSTER WEIGHT	<1Kkg

INSTALLATION

1

The signal is received from the outdoor cell towers and transmitted through the cable to the booster box.

2

The booster box receives the signal from the outdoor aerial and retransmits it to the indoor antenna via a cable.

3

The panel antenna mounted on the wall receives the signal and retransmits a clean, high-quality phone signal throughout the property.
