

# Hero Force 600

SKU SHA2831-600

PRICE \$1045

## FEATURES

- Improves 4G signal and voice calls on Telstra, Optus, Vodafone, and most Australian mobile networks, with support for basic 5G coverage
- Universal solution for rural, regional, urban, and low-coverage locations where outdoor signal is weak but available
- Delivers clearer voice calls and more reliable 4G and basic 5G mobile data indoors

## ABOUT

Reliable signal starts at the source, and Signal Hero Core is built to bring it into your home. Missed calls, dropped connections, and unstable data do not have to be part of daily life in rural, regional, or low-coverage areas.

Designed as a universal solution, Signal Hero Core works with Telstra, Optus, Vodafone, and most Australian mobile networks, delivering reliable 4G voice and data, plus basic 5G coverage where available. **Designed for larger and two-storey buildings where more than one indoor antenna may be required**, it captures available outdoor signal through a dedicated external antenna, transfers it via professional-grade cabling to the booster, and redistributes the strengthened signal indoors using multiple panel antennas for wider indoor coverage. The result is clearer calls and more consistent mobile data throughout your property.

Suitable for everyday mobile use and 4G SIM routers, it is ideal where indoor reception is weak but a usable outdoor signal exists.

Installation follows a straightforward, proven layout used across residential, rural, and regional properties. Our technical support team is available before and after purchase.

**There are no subscriptions or ongoing fees. Signal Hero Core includes a 60-day money-back guarantee and a 3-year warranty for added confidence.**

## INSTALLATION

1

The signal is received from the outdoor cell towers and transmitted through the cable to the booster box.

2

The booster box receives the signal from the outdoor aerial and retransmits it to the indoor antenna via a cable.

3

The panel antenna mounted on the wall receives the signal and retransmits a clean, high-quality phone signal throughout the property.
