

Hero Force 1000

SKU SHA2831

PRICE \$1350

FEATURES

- Improves 4G signal and voice calls on Telstra, Optus, Vodafone, and most Australian mobile networks, with support for basic 5G coverage
- Universal solution for rural, regional, urban, and low-coverage locations where outdoor signal is weak but available
- Delivers clearer voice calls and more reliable 4G and basic 5G mobile data indoors

ABOUT

Reliable signal starts outside, and Signal Hero Force 1000 is built to bring it indoors across properties up to 1000 sqm. Missed calls, dropped connections, and unstable data don't have to be part of daily life in rural, regional, or low-coverage areas.

Designed as a universal solution, Signal Hero Force 1000 works with Telstra, Optus, Vodafone, and most Australian mobile networks, delivering reliable 4G data and clear voice calls throughout larger homes, offices, and commercial buildings. Designed for larger and two-storey properties where multiple indoor antennas are required, it captures available signal from the nearest mobile tower using a dedicated outdoor antenna, transfers it through professional-grade cabling to the booster, and redistributes the strengthened signal indoors via multiple panel antennas for wider indoor coverage. It works effectively for everyday mobile use and 4G SIM routers, helping stabilise voice calls and mobile data across larger indoor areas.

Installation follows a proven layout used in residential, rural, and commercial properties. Our technical support team is available before and after purchase.

No subscriptions or ongoing fees. Includes a 60-day money-back guarantee and a 3-year warranty.

INSTANT SIGNAL BOOST

UP TO +70db GAIN

SUPPORTS UP TO 25 USERS CONNECTIONS

FAST NETWORK & DATA SPEED

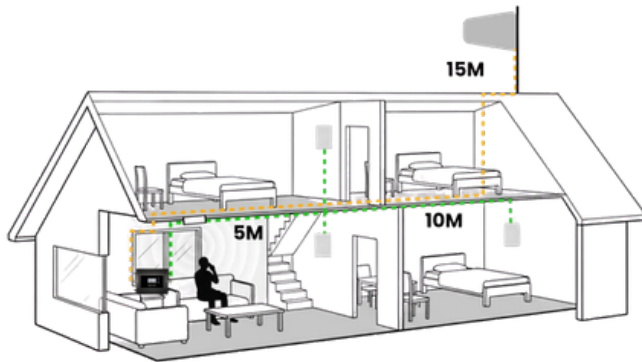

KIT INCLUDES

SPECIFICATIONS

MODEL NUMBER	SHA2031-1000
FREQUENCIES	BAND 28, 3 and 1 700 MHz / 1800 MHz / 2100MHz
MAX GAIN	70 dB ±2
IMPEDANCE	50 Ohm
POWER SUPPLY	AC 100-240V
CONNECTORS	N-FEMALE
BOOSTER DIMENSIONS	22 x 14.5 x 5.5 cm
BOOSTER WEIGHT	<0.9Kkg

INSTALLATION

1

The signal is received from the outdoor cell towers and transmitted through the cable to the booster box.

2

The booster box receives the signal from the outdoor aerial and retransmits it to the indoor antenna via a cable.

3

The panel antenna mounted on the wall receives the signal and retransmits a clean, high-quality phone signal throughout the property.
