

Hero Ultra 600

SKU SHA28317

PRICE \$1250

FEATURES

- Improves 4G signal and voice calls on Telstra, Optus, Vodafone, and most Australian mobile networks, with support for a wider range of 5G frequency bands
- An excellent choice for urban locations where multiple 4G and 5G frequency bands are in use, while also performing in rural, regional, and low-coverage areas
- Delivers clearer voice calls and faster, more reliable 4G and 5G mobile data indoors

ABOUT

A reliable signal starts at the source, and Signal Hero Ultra 600 is designed to bring stable mobile connectivity into your home or small workplace. Missed calls, dropped connections, and slow data no longer need to be part of daily life in rural, regional, urban, or low-coverage areas.

**Signal Hero Ultra works with Telstra, Optus, Vodafone, and most Australian mobile networks, delivering reliable 4G voice and data while supporting a wider range of 5G frequency bands.** It is an excellent choice for urban locations where multiple 4G and 5G bands are in use, while also performing well in regional and low-coverage areas. A dedicated outdoor antenna captures available signal, transfers it through professional-grade cabling to the booster, and redistributes the improved signal indoors via a panel antenna, providing reliable coverage for 1–2 rooms or single- and double-storey homes.

Ideal for smaller homes, home offices, and properties with a few users, it also supports 4G and 5G SIM routers.

Installation follows a proven layout used across Australian properties. Our technical support team is available before and after purchase. **No subscriptions or ongoing fees. Includes a 60-day money-back guarantee and a 3-year warranty.**

INSTANT SIGNAL BOOST

UP TO +70db GAIN

SUPPORTS UP TO 25 USERS CONNECTIONS

FAST NETWORK & DATA SPEED

## INSTALLATION

1

The signal is received from the outdoor cell towers and transmitted through the cable to the booster box.

2

The booster box receives the signal from the outdoor aerial and retransmits it to the indoor antenna via a cable.

3

The panel antenna mounted on the wall receives the signal and retransmits a clean, high-quality phone signal throughout the property.
